

## AMENDMENTS TO THE SPECIFICATION

Please replace the paragraph beginning at page 15, line 15 of the specification with the following paragraph:

Context 204 can include historical or other data meaningful to an event. Context 204 can add significance to the event. The context 204, modeled as a relation, has a local cache 205 that can return cached context look up query result. Context 204 can be synchronously pulled by context capturer 102 (Fig. 1C) from a source system 203, such as a data warehouse.
